Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Rupture disk on separator popped off and misted oil over location. Well was shut in and stopped flow of oil to atmosphere. we set a liner on location and stock piled all contaminated soil and snow. Synergy will haul all contaminated product to waste management and provide manifests for contaminated soil. Synergy will take analytical samples from effected soil. All agencies involved will be provided analytical samples. Synergy will also spread microblaze on areas that need further attention. Weather permitting we will resolve this issue in a timely matter.
