To: Jacob Evans &lt;jacob.evans@nblenergy.com&gt;

Jacob,

COGCC has reviewed the Ground Water Monitoring and Closure Report submitted by Noble Energy, Inc. on February 9, 2015 for the Betz 30-11, 30-14 location. Based on the information presented, it appears that no further action is necessary at this time, and COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soil exceeding COGCC standards or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site.

Remediation Project #8392 has been resolved in the Colorado Oil and Gas Information System.

Please contact me with any questions regarding this project.

Regards,

Rick Allison, P.G.
