**Subject:** State Reportable Release

Chris,

While unloading recycled produced water, a truck driver pulled away from the unloading manifold with the hose still attached to his transport at the location noted below. This caused the release of ~21.6 bbls of recycled produced water. All water was contained on the wellpad. The responsible contractor has begun vacuum recovery operations.

Burkhardt 34N-3HZ

Please let me know if you have any questions.

Thanks,
