To: OGCC EnviroScan - DNR <dnr_ogcc.enviroscan@state.co.us>

Please upload the email with the following information:

Unique identifier (REM/Spill/NOAV #, etc.): REM 8051, Location 335658

Document number (leave blank if one needs to be assigned):

Date received: 3/16/15

Is data entry needed (Y/N): N

Notes: NA

Thanks!

Alex,

We will get you a formal update within the next few days. Multiple rounds of soil sampling have been conducted, would you like us to pass along those lab analyses?

No additional material from other well pads has been brought to or landfarmed on this location.

Thank you!

Bryan

Subject: Fwd: COGCC FIELD INSPECTION REPORT [Doc#674701063]

Debbie and Bryan-

I was reviewing this INSPECTION and then the Site Investigation and Remediation Work Plan (REM 8051) regarding the landfarm and have some questions and concerns.

The Work Plan states:

Remediation Start Date: 9/30/3010

Anticipated Completion Date: 10/31/2013

Submit Date signed by Bryan Burns: 6/27/13

Approved by COGCC C. Lujan: 10/31/2013

The Work Plan stated that *samples will be collected periodically for Table 910-1 to evaluate the progress of remediation and to determine when treatment has been completed.* Has any sampling been completed?

Are materials being brought on to this location from other Locations besides the 1.6 cubic yards form separators from the Berry L-04, M-04, and D-20 pads?

There is a Sundry (Document Number 400465196) Submitted on 8/15/2013 providing a NOTICE OF INTENT and Approximate Start Date of 2/24/2012 for the following:

Drill cuttings on Chevron O36B location contain total petroleum hydrocarbons (TPH), Conductivity, SAR, pH, and Arsenic

concentrations above COGCC Table 910-1 standards. Berry is land-treating cuttings on location to reduce TPH, Conductivity, SAR,

pH, and Arsenic concentrations below the 910-1 standards. Upon successful remediation indicated by soil sampling lab analyses,

cuttings will be buried on location as a precursor to final reclamation.

The Sundry was then approved by COGCC on 10/2/2013.

Please provide a current status of this Facility including but not limited to the frequency of working the materials, addition of nutrients or additives, periodic sample collection, berm maintenance, etc. Based on the time line, this land farm should now be permitted per Rule 908 as a Centralized Exploration & Production Facility which would include appropriate financial assurance.

Thanks

Alex
