Township: 2N Range: 64W

County: Meridian: 6
Was the operator contacted? Y If yes, contact name: NOBLE ENERGY INC

Complaint Issues

<u>Category</u>	<u>Assigned to</u>	<u>Description</u>
ACCESS	Jim Precup	*Weld County - Keenesburg, access road located off of County Road 55 in between County Road 18 and County Road 20*

Access road off of County Road 55 to McIntosh tanks and Gerkin 33-21 well is not being maintained by Noble. I use the access road and have a ROW agreement with the landowner to get to my residence. I have been using my own tractor to plow snow and keep the road graded when it gets all wash boarded out, therefore providing my share of maintenance to the road. I have asked Noble about graveling the first portion of the road from County Road 55 because when it snows and the snow melts or it rains the road is difficult to drive on and the heavier trucks create deep ruts in the road. I have a video on my cell phone of water that was flowing like a river down the road which of course will wash any gravel that is left away, all I am asking is for them to add some road base/gravel to the access road. They continue to use the road to get to the tanks and wells and drive much faster than the required 15MPH speedlimit. I have not been able to locate an access road agreement for Noble and the owners of the surface where the access road it located (Carole Gerkin). The road needs gravel, they use the road to access the wells and tanks and most of the traffic is from them not private landowners that also use the road.
