**Inspector Comment:**

Site visit to confirm cleanup and NFA for spill#438131. Tank battery is separate from well pad and is where release occurred. Multiple landfarm batches were treated due to pad size constraints. All landfarm results submitted by WPX comply with Table 910-1 Standards. Two stockpiles of soil ~500cy? are at well pad entrance and are presumed to be treated soils and/or overburden with large boulders. Dug ~ 1ft bgs into stockpiles and did not detect any petroleum staining or odors. Based on submitted lab data and site observations, NFA is confirmed and stockpiled soil cleared for beneficial re-use.
