Operator Comments:

In response to Inspection No. 674701009, for Location ID # 335656 Encana Oil and Gas (USA) Inc. has reviewed the corrective action item "Install and maintain BMPs to prevent migration of sediment" and will complete the work as soon as practicable while following best management practices described in our Wildlife Mitigation Plan, which is a formal agreement with Colorado Parks and Wildlife and provides guidelines to minimize the possibility of disturbing wildlife. Specifically, we will minimize our surface disturbance, recontoured slopes where possible, and stabilize all areas not in use with vegetation, mulch, gravel or other methods, between July 31 and December 15.

Encana Oil and Gas (USA) Inc. has also reviewed the corrective action item: trailer with container loaded on it - remove unneeded equipment. Since the inspection was conducted, the container has been filled and is currently being used to support well operations. The trailer and container will remain on location as long as needed for production operations.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
