Joe/Erich-

I spoke with Dirk Sutphin at the COGCC about this re-entry. He would like us to drill cement down to 1700' before calling it good. From there we will set a 50 sk plug, come uphole to 770' and then set our (planned) plug of 347 sks bringing cement to surface. Let me know if you have any questions

Thanks,

Ryan Olson  
Production Engineer  
Wattenberg Business Unit
