Attention: Mr. Chris Canfield  
Environmental Protection Specialist  
1120 Lincoln St Suite 801  
Denver, CO 80203  
Chris.canfield@state.co.us

Dear Mr. Canfield:

**Reportable Spill at Facility 441105 (Doc # 400798670)**

This letter is to serve as a closure request for the above referenced spill. The spill of approximately 125 barrels of condensate was entirely contained within lined secondary containment. Standing fluids and impacted gravel were removed from inside the containment and backfilled with clean gravel. Therefore, there are no post cleanup soil samples to submit in the supplemental report. I have attached a couple photos showing the site post cleanup.

Please feel free to reach out to me with questions, thank you.
