Comment: Poor revegetation along cut slopes on the northwestern edge of the well pad. Hundreds of musk thistle seedlings were observed within the eastern portion of the interim reclamation area. Musk thistle is a State and La Plata County-Listed noxious weed. Control weeds in the project area at the appropriate time, but before seedhead maturity in 2015. See attached photos.

Comment: **Erosional channels approximately 2 feet wide and 1 to 3 feet deep are eroding both sides of the access road. Erosional channels are also forming along the well pad cut slope and fill slopes on all sides of the well pad where concentrated stormwater flows onto and off of the well pad surface. See attached photos.**

CA: **Stormwater BMPs need to be installed to stabilize the access road and well pad. Additional revegetation efforts or installation of rolled erosion control products (or similar approach) may be necessary to stabilize the large cut-slope.**

Location does not meet reclamation regulations. Stormwater erosion and debris removal needs to be controlled throughout the project area by May 15, 2015. Weeds need to be controlled no later than seedhead maturity in 2015.	RoyC	04/07/2015
