1	Drilling/Completion Operations		A cased-hole pulsed neutron log with gamma-ray log will be run from the kick-off point into the surface casing. A cement bond log with gamma-ray will be run on the production casing (or intermediate casing if production liner is run). The horizontal portion of the wellbore will be logged with a measured-while-drilling log with gamma-ray. The Form 5, Completion Report, for this well will list all logs run and have those logs attached. The Form 5 will clearly state "No open-hole logs were run" and reference the Rule 317.p Exception granted for the well.

Operator Comments:

PDC requests an exception for the Becker Ranch 5M-HZ pad to Rule 317.p: Requirement to Log a Well. PDC will run a cased-hole pulsed neutron log with gamma ray log from kick-off into the surface casing on one of the first wells drilled on the pad. All wells will have a cement bond log run on intermediate casing.
