**General Comments**

<b>User Group</b>	<b>Comment</b>	<b>Comment Date</b>
Environmental	COGCC approves the removal of wind-powered turbines from three wells as indicated in the attached report. TPH concentrations in these three wells were below 500 mg/kg. Although PAH concentrations were slightly above Table 910-1, these values are consistent with background and local geology. The addition of 3 turbines in locations where HC concentrations are above Table 910-1 is an improvement to the current remediation system.	4/22/2015 4:29:26 PM
