John and Melissa – James Jackson told me you guys have some questions about the water well on our property at the Ward Riverdale location. We recently purchased that property and that water well is still registered to a previous owner of that property, Todd Creek Farms Metropolitan district. Last week we filed a change of well owner with the department of water resources, but that change hasn't gone into effect yet on the website. That well is not abandoned, but is currently not in use and has a temporary steel cap on top of it. Additionally it is located in a small, cinderblock well house. During drilling and completion we will have containment on that well to prevent any potential contamination.
