SPILL/RELEASE REPORT (SUPPLEMENTAL)

This form is to be submitted by the party responsible for the oil and gas spill or release. Any spill or release which may impact waters of the State must be reported as soon as practicable; any spill over 20 bbls must be reported within 24 hours and all spills over five bbls must be reported within ten days. Submit a Site Investigation and Remediation Workplan (Form 27) when requested by the Director.

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

During a site inspection, oil and produced water were discovered on the ground surface near the separator resulting from a line failure at the HSR Van Schaack 4-11 site. Approximately 2 bbls of oil and produced water was released onto unlined containment. A hydro-vac truck was used to recover approximately 0.5 bbls of the released oil and produced water. The petroleum hydrocarbon impacted soil is being excavated. Groundwater was encountered in the excavation at approximately 7 feet bgs. Laboratory analytical results received on April 10, 2015 confirmed BTEX impacts to groundwater above the CGWQS. The groundwater analytical results are summarized in Table 1. Additional soil and groundwater samples will be collected from the excavation. The analytical results and excavation details will be provided in a supplemental report. A topographic Site Location Map showing the general location of the release is attached as Figure 1.
