John,

As per our conversation and your request, our internal preference is to go beyond the 75 foot COGCC setback-wellhead to facilities. We prefer our facilities to be 80-100' setback from existing wellheads. In addition, in this particular case, we needed more than 75' in order to accommodate room in the event a workover rig needed to rig up over the existing well on location. Also, we were made aware that we have purchased the easement to the north of the existing pad, therefore, we must adhere to setback requirements there.

Please let me know if you need additional information.

Thanks,

Andy
