On 5/7/15 COGCC SW EPS Jim Hughes conducted an environmental field inspection of the Burlington Resources Spill/Release Point #441760. The site was visually inspected and conditions documented. A lath with a white ribbon marked the release point. Standing water near the release point was tinted brown. Recent precipitation, after release discovery, was noted during this inspection. Evidence of flow leaving the ROW in the direction of Chestnut Drive was present. A valve access on the ROW, to the north of the release point, was labeled with a "Do Not Operate" tag indicating that the line was shut in due to a leak.	hughesj	05/12/2015
