Jan,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comment.

In the Cultural Distance section you have listed the distance from the nearest production facility to the nearest property line as 2 feet. From your Location Drawing this distance appears to be from the edge of the production facility area and not a specific piece of production equipment. As we have specific safety setbacks to property lines for production facilities, please provide me with the distance from the nearest production equipment (tank, separator, VRU, whichever it is) to the nearest property line so that we can be certain safety setbacks are being met.

Please respond to this correspondence by June 12, 2015. If you have any questions, please contact me. Thank you.

***Doug Andrews***

Doug,

The edge of the tanks will be no less than 35' from property line.

Thanks Doug, let me know if you need anything else.
