Attention: James Kenney

Colorado Oil & Gas Commission
1580 Logan Street
Suite 380
Denver, Colorado 80203RE: UPRR Cronk Lease
Pit Permit

Dear Jim:

Relative to your inquiry concerning the use of a pit at the UPRR Cronk Lease, please be advised that all produced water is disposed and injected into the UPRR Cronk #2 Well. We do maintain an emergency storage pit in the event we are unable to dispose of the water due to a mechanical failure or power outage. This lease was acquired from Amoco a number of years ago and we have been under the assumption that permission for an emergency pit had been granted, as this pit had been in existence prior to our acquisition.

Please advise if you wish us to complete a formal pit application for this location.

Sincerely,

David G. Walsh
