Complaint Issues

<u>Category</u>	<u>Assigned to</u>	<u>Description</u>
SOIL CONTAMINATION	John Axelson	I am concerned about multiple spills of produced and flowback water during off-loading of water disposal trucks that have occurred this week, including most recently, yesterday morning, during hours of routine operation at the Triton 1 facility. This activity may be resulting in contamination of soil and groundwater.

<u>Date Notified</u>	<u>Party</u>	<u>Contact</u>	<u>Area Code</u>	<u>Phone</u>	<u>Email</u>	<u>Details</u>
2015/05/22	Triton Water Disposal	Taylor Henricks	719	331-3941		Mr. Henricks was unaware of any recent spills during off-loading of trucks at the facility. He said they have operating procedures requiring buckets to be placed under valves when hoses are disconnected to catch any drips. The area where trucks unload is underlain by a liner. The facility also has a network of seven monitor wells that are sampled quarterly to verify no impacts to shallow groundwater. Past sampling results have verified no impacts to groundwater. COGCC will perform a site inspection on May 26, 2015.
