**Inspector Comment:**

Inspection conducted on June 01, 2015. Brandon Coutts from Vaquero and Carlos Lujan met onsite. Brandon provided information about the Clough 27-11 operation: An active well connected to a meter (attached photos show the wells head and the meter house). There is nothing else onsite. No junk, trash, staining or anything that could represent an environmental issue was observed on the premises. A Vaquero sign is displayed on the meter house. Pit: There is no signs of pit (either existing or backfilled). According to Brandon, there has never been a pit since Vaquero started operating this Site. Although a pit is registered in COGCC database (status unknown), there are no records of pit permit or any other documentation regarding the pit. The pit status is dated 1999, the year that the Pit Inventory was completed. According to 3 inspection reports conducted in 1998, 2007, 2015 (and today's inspection) no pit has been observed at this location: Inspection #437941 (03/17/1998): Pits (reserve, production): None Inspection #200107760 (2/5/2007): No Pit. Inspection #666800930 (05/05/2015): No surface indication of Pit. This inspection (#671000174 - 06/01/2015): No surface indication of Pit. It is safe to conclude that there has never been a pit constructed on this location. The status of the pit will be changed to AL (abandoned Location).
