Bonnie,

The COGCC is in the process of reviewing the Form 2A for the Woolley-Sosa-Becky 7H-E168 (document number 400746954). In order to complete our review, please address the following:

1. The Facility Layout Drawing and the Facility list on the 2A need match. The following is not consistent between the two documents.
 - a. The Facility drawing has 15 wells and separators and the facility list has 16 for both. Please confirm the number of separators and provide an updated Facility Drawing or let me know if the number should be changed on the 2A. If current wells or tanks are not going to be abandoned or closed, then they should be part of both the drawing and list;
 - b. The Facilities list does not have the 3 MLVTs listed and there is not a statement regarding the MLVTs meeting the COGCC policy on MLVTs. Please add the MLVTs to the Facility Layout Drawing.
 - c. The original Form 2A for location 305447 listed 2 pigging stations, but the Facility Drawing only has 1 and it is not listed on the current Facilities list. Please confirm the pigging stations.
2. Please provide COGCC with information regarding the fate of the current well and facilities at the location.
3. Please provide a Land Application facility ID for the cuttings disposal.
4. The buffer zone box is not checked, with your concurrence, I will check the box
5. Based on the land use as dry crop land and future use of residential, the plant community information is not needed. With your concurrence I will remove the plant communities in the disturbed area information.
6. Please provide pipeline information to the COGCC.
7. Please provide the BMPs for Rule 604.c.(2) D, F, E, H, I, J, and U, and Rule 803.
8. Please provide a hydrology map or an explanation in the comments that a surface water body is greater than 1,000 feet from the location.
9. Please provide a Surface Use Agreement for the right to construct.

Let me know if you have any questions.

Thank you,

Rebecca
