1

Diana,

After we P&A'd our surface hole on Viper Pyro 41N-14HZR this weekend, we discussed skidding 30 ft South to re-drill the same well. Our regulatory team is working today to get final plats done and paper work required to submit to you, however, they don't expect to get this sent out until late afternoon today. Our drilling rig will be ready to spud this "new well with same BHL and landing" by this evening. I'm hoping I can get verbal approval to proceed, knowing that it's not likely we will get full approval by tonight. The new well will be the Viper Pyro 41N-14HZR. I have attached a directional plan and the surface coordinates are below. I will also call you now to follow up and answer any questions you may have. Thanks for your help.

**Viper Pyro 41N-14HZR Surface Coordinates** (Re-drill of the abandoned Viper Pyro 41N-14HZR well due to stuck surface casing)

Lat: 40.230745

Lon: -104.885296

800' FNL and 265' FWL
