

Photo 1. View from southwestern corner of project area facing center. Desirable vegetation is comprised of smooth brome (*Bromus inermis*), rabbitbrush (*Chrysothamnus nauseosus*), and western wheatgrass (*Pascopyrum smithii*). Hoary cress (*Cardaria draba*) and cheatgrass (*Bromus tectorum*) can be seen in the foreground.

Photo 2. View of southern portion of project area from southwestern corner facing eastward. Hoary cress is the white flowered plant in the foreground.

Photo 3. View of western portion of project area from northwestern portion facing southward. Good grass revegetation here.

Photo 4. View of musk thistle (*Carduus nutans*) and hoary cress within southwestern portion of the project area.

Photo 5. View of Canada thistle (*Cirsium arvense*) plants within the western portion of the project area.

Photo 6. View of hundreds of Russian knapweed (*Acroptilon repens*) plants within the eastern portion of the project area.
