☐ **DIGITAL WELL LOG UPLOAD**

☐ **DOCUMENTS SUBMITTED** Purpose of Submission: _____

RECLAMATION**INTERIM RECLAMATION**

☐ Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

☐ Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

COMMENTS:

Five soil borings were drilled on 06-02-2015 to delineate the extent of the contamination (map attached) and PID readings were collected in order to field screen the samples and decide which samples were to be sent to a laboratory for TPH (GRO, DRO, ORO) analysis. The laboratory analysis is attached. No BTEX compounds were found in any of the samples. The only sample with TPH (GRO, DRO, ORO) exceeding 50 mg/kg was from boring V1 at a depth of 6 feet. This boring was completed near the leak (see attached map). The sample collected from a depth of 10 feet from V1 has a TPH concentration of about 15 mg/kg (GRO). The only other sample that contained TPH (GRO) was the sample collected from boring V3 which is to the east of the boring. It appears that the contamination is along the road/pipe line and is about 50 feet long and 20 feet wide. Groundwater was not encountered during the drilling operations.

Excavation will begin on Tuesday, June 16, 2015 at the request of the surface owner and will follow the area delineated with the soil borings. Once the excavation is complete, the flowline will be repaired and tested following rules 1100. Soil samples from the excavation will be analyzed for TPH (GRO, DRO, ORO) to verify that all contaminated soil has been removed.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million)

Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
