Subject: Wattenberg Compressor Station No. 5 Monitoring well 7

Randle: Thanks for returning and signing the Form 27 (#3333).

Per our phone conversation and the information on the Form 27 (#3333), we see that contamination in the area around MW-5 has been addressed by Kerr-McGee Oil & Gas and is being completed under Kerr McGee's own Form 27 #4228.

The other area addressed on the Form 27 (#3333) is the area at MW-7. This monitoring well is/was located on the West end of EnCana Energy Resources' site. In 1992 Public Service Company of Colorado sold all of its interests in the site (Parcel A, the west half of the site) to Vessels Oil and Gas Company. Sometime after that EnCana became the operator and owner of the site. Per the 1992 Purchase and Sale Agreement it is Xcel Energy's opinion that Xcel Energy is no longer responsible for this area and is willing to assist EnCana with its' follow-up regarding this issue. If you have any questions please contact me at (720) 497-2108.

Regards,
