October 11, 2007

To our Valued Clients,

In an effort to improve our service you, we have made some significant changes to your report. As of October 1, 2007, Green Analytical Laboratories, Inc. has implemented a new laboratory information management system (LIMS). This will greatly enhance the quality and efficiency of our laboratory's data tracking and reporting. All of the parameters will now be listed in alphabetical order on a one or two page report. All trace metals will be reported in $\mu\text{g/L}$ instead of mg/L , with the exceptions of the cations; Calcium, Magnesium, Potassium and Sodium. The expression, BDL (below detection limit), will print when the parameter result is less than the laboratory's reporting limit.

Sincerely,

Debbie Zufelt
