Operator Comments:

The cement program is not changing and the casing will still be run to TD.
Surface Hole & Surface casing depth is still +/- 2500'.
Production Casing depths are slightly shallower MD's based on the new x - y coordinates at TD and we will pump the same cement program on all similar wells 630 sx of lead and 330 sx of tail.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
