Michael,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

1) In the Water Resources section you have indicated the distance to the nearest downgradient surface water feature is 1,000 feet. Yet your Hydrology Map indicates there is a downgradient intermittent stream 699 feet away. Therefore I would like to change that distance in the Water Resources section to match the Hydrology Map.

2) In the Water resources section you have indicated that the nearest water well is 3,796 feet away which appears to be water well #57171. A review of that water well's permit indicates its application was denied and the well was never drilled. The next nearest water well is Permit #454 which is located greater than a mile away. Therefore, I would like to change the Water Resources section to reflect this.

Please respond to this correspondence by July 11, 2015. If you have any questions, please contact me. Thank you.

Doug Andrews
