No analysis for below parameters-Water well went dry per owner.

Contact Davis.Hauling water well went dry and may or may not pull pump.May drill new well later. NO POSTTEST- WELL DRIED UP PER OWNER. SEND NOTIFICATION TO STATE FOR COMPLIANCE.

COMMENTS

Four Corners Geoscience conducted onsite field chemistries, observation of physical characteristics of water while pumping system to receive a fresh aquifer sample. Water samples were collected and delivered to EPA quality assured lab for analysis. Water samples for bacterial analysis were collected and delivered to San Juan Basin Health in Durango, CO. Samples for headspace gas analysis were taken to FCG lab per-USGS standard and methods for these analysis. Four Corners Geoscience is not liable for the results of these analysis and recommends referral to specialists in the field or water treatment. All methods are conducted in accordance with the requirements for this groundwater monitoring program in La Plata Colorado per Colorado Oil and Gas Conservation Commission Order # 112-156 and 112-157 established in July 2000. *NO WATER WELL TEST NO WATER WELLS DRILLED
