Attached is Lynn's spreadsheet for the water wells currently sampled by conocophillips. I've added a worksheet called Data Review where I have indicated which field and lab data sheets I have. Although Lynn's field data are entered on one of the worksheets in her spreadsheet, I have asked her to email the field forms to me, so the COGCC will have a complete set of raw data sheets.

I have a couple of questions:

1. I only have analytical results for one sample for each of the following iid numbers. Have other samples been collected from these wells (see Data Review for the sample dates)

- # 597 = Zelliti
- # 1038 = Hall spring
- # 1039 = Hall main house
- # 1040 = Carmack
- # 1041 = Hess spring
- # 1042 = Hess main house

NOT DRILLED

2. I don't have either the field or lab data sheets for iid # 1036 – Cullipher for the sample collected on 2/27/03

emailed for clarification 5/12/03

3. Lynn, your spreadsheet indicates a sample collected on 12/23/00 from iid #1032 – Zaubaris. I don't have a lab report for a sample on that date, but I do have one for a sample collected on 1/20/01, do you think the "12/23/00" date is a typo and should be "1/20/01"?

4. Mike, as I mentioned in my voice mail to you, I would like to get the laboratory reports for the gas compositional and gas & water isotopic analyses conducted on samples collected from iid #25 – Ollier and iid #234 – Greif and a copy of Tony Gorody's report on his interpretation and conclusions regarding the #25 – Ollier well data.

Thanks for your help. I am nearly caught up on all of the data entry for all of the samples collected by all of the operators! Once I have compiled all of the data I will be using it and previously collected data to prepare a report to the COGCC Commissioners.

Regards
