Distance from completed portion of wellbore to nearest wellbore permitted or completed in the same formation: 660' from the proposed Waag 7 or 13. (CDL)

Distance to nearest permitted or existing wellbore penetrating object formation: 660' from the proposed Waag 7 or 13. (CDL)

The BHL on this sidetrack will remain the same, so a revised Well Location Plat and Deviated Drilling Plan are not attached as they are not required.

We were having issues getting build rates on our curve. We tried to recover sacrificing some azimuth but were in jeopardy of landing in the Carlisle and off target line. Going forward we would like to set a 500' (17.5#) cement plug across the interval from 6650-7150MD. This will allow us to kick off again and retry this curve, we moved KOP up a bit to allow us to focus on azimuth early in the curve.

Total MD drilled to: 7430'
Surface casing – 9 5/8" 36# set at 871'.
No fish in hole

The plan is to pump one 500' plug (243 sacks) with Baker Cement-17.5#
Proposed sidetrack point – 6780' (Original KOP 6800')
Objective formation of sidetrack/curve: Codell
Proposed BHL: 1980 FNL 2241 FEL Sec 24, T7N, R66W (Same as original APD).
