Barbara,

You have included an Operator Comment on the referenced Form 2A Oil & Gas Location Assessment requesting that Kim Rodell with Upstream be contacted with any questions about the permit. However, Kim is currently not listed with us as a Designated Agent for EOG Resources Inc. Therefore, I am contacting you concerning the following.

1) In the Drilling Program section you have indicated that a closed loop system will **not** be used for drilling fluids. However, no Drilling Pit is listed in the Facilities section. Based on the Form 2As for your adjacent Randall Creek 29 locations, I suspect this is an error and that EOG does plan to use a closed loop system when drilling the wells in this section. Please confirm if this correct.

2) Because the locations current and future land use is Crop land (specifically, Dry land), the Plant Community section does not apply nor is the inclusion of a Reference Area Map and Reference Area Pictures attachment required. Therefore I would like to clear the Plant Community section and remove those two attachments from this Form 2A.

Please respond to this correspondence by August 28, 2015. If you have any questions, please contact me. Thank you.

Doug,

That's an error as to the closed loop, but this 2A is going to be kicked back to draft for a revision to a plat.  
We'll pull attachments at that point.

Thanks,

*Barbara Griswold*

Barbara,

Your response is confusing as Well Plats are not a required attachment on a Form 2A, only on a Form 2 APD. Also, once a Form 2A is In Process, it cannot be pushed back to Draft, only Withdrawn. This is why I asked for your concurrence to remove the Reference Area Map & Pictures attachment.

Doug,

I did get your phone call and appreciate you letting me know. Barbara will just forward on what we need to review and we'll go from there. Again, thanks for the courtesy follow-up.

Kim
