MECHANICAL INTEGRITY TEST

1. Duration of the pressure test must be a minimum of 15 minutes.
2. An original pressure chart must accompany this report if this test was not witnessed by an OGCC representative.
3. Injection well tests must be witnessed by an OGCC representative.
4. For production wells, test pressures must be at a minimum of 300 psig.
5. New injection wells must be tested to maximum requested injection pressure.
6. For injection wells, test pressures must be at least 300 psig or average injection pressure, whichever is greater.
7. A minimum 300 psi differential pressure must be maintained between the tubing and tubing/casing annulus pressure.
8. Do not use this form if submitting under provisions of Rule 326.a(1)B. or C.
9. Written OGCC notification must be provided 10 days prior to the test via Form 42, Field Operations Notice
10. Packers or bridge plugs, etc., must be set within 100 feet of the perforated interval to be considered a valid test.

Title: Regulatory Specialist Email: jjustus@chevron.com Date: 6/1/2015

Based on the information provided herein, this Notice (Form 21) complies with COGCC Rules and applicable orders and is hereby approved.

COGCC Approved: Arauzo, Steven

Date: 7/31/2015

CONDITIONS OF APPROVAL, IF ANY:

This well has been waiting on completion since 9/22/2007 and is thereby incapable of production. Pursuant to definitions in the 100-series rules, the well is considered to be Temporarily Abandoned rather than simply Shut-In. As a result, this well is subject to Sundry Notice and MIT testing requirements outlined in Rules 319.b and 326.c, respectively.

The MIT is approved with the following COA:

1) The operator will file a Form 4 Sundry Notice to request maintenance of TA status and to provide a description of future plans for utilization of this well by AUGUST 31, 2015.
