Bob,

This is to confirm COGCC receipt of the report. Can you please prepare a basic Form 27 to go along with this. That will allow me to get it entered into our system. You can fill out the top part of the form and state, "see attached report," on the other sections. That would help me a great deal. I'm sure Mr. Braun could do this on your behalf. The Form 27 is not an eForm yet, so you can still pull the pdf off the web site and submit to me as a pdf.

Thanks again,

John E. Axelson, P.G.

Subject: Pace 2 Flowline Release

Bob,

I spoke with Paul Schneider at Anadarko. He said they did not perform any additional cleanup in the open excavation. They provided some pictures that show the excavation is in the same condition as it was last week. They agreed to submit their split sample results that were collected when your consultant performed soil sampling.

Before you replace your flowline section we need to verify that the confirmation samples collected below the release point comply with Table 910-1 standards. Please submit the results of your sampling analysis as

soon as you can.  
Thank you,  
John
