Scott,  
You are right. I realized that after I sent the email. Thanks for the clarification.

Thanks Carlos. I wanted to clarify that your email below does not apply to the Kaufman #1 pit, but does apply to the Specialty 41A-28-692 pit (facility 436478). The Kaufman #1 pit was just closed by you minutes ago and the approved Form 4 (document # 400724781). I have attached the recent email for reference. The other two facilities listed below are correct.

Jake,

I apologize for the delay in responding to your email.

COGCC approves suspending the pit closure process due to the current weather conditions that difficult field activities. It would be a good idea to submit a Form 04 with a similar language as in your email, so that it is on record in the database for anyone that wants or needs to know.

I believe that the Kaufman #1 and CB-Werner #1 are in the same situation. If that is the case, please submit a Sundry Notice, e-form 04 for the other two as well, so that I can approve them online.

Kaufman #1 - REM #8505

MDP #4 - REM #8506

CB-Werner #1 - REM #8507

Thanks,

Carlos

Carlos,

On behalf of Bill Barrett Corporation (BBC), we have completed the pit closure sampling at the MDP 4 (REM #8506). For your reference, I have attached the approved Form 27 for this project. The samples that were collected from the pit bottom were compliant with COGCC standards or were below background concentrations, and we wish to close the project via a Form 4 as you requested. The email with your request can be reviewed below in this email chain. Due to oncoming winter weather conditions, BBC requests approval to delay backfilling/reclaiming of this pit until the second quarter of 2015. Delaying backfill work until warmer weather conditions are present will ensure that the pit is properly reclaimed. Also, the pit liner has been removed from the site and recycled.

Thanks
