Hi Melissa,

Please see my responses below in red. Please let me know if you have any additional questions.

Thanks!

Kelsi

The COGCC has completed the technical review of the above-referenced Form 42 and identified the following inconsistencies,

1) The Public Road to the north of the location appears closer than 1 mile. Please verify distance. The road immediately to the North of this location was not considered a public road as it is used only by the surface owner, Paul Sater, for his agricultural operations and by operators to access existing locations on the property. There is no use by general public and/or to access residences, businesses, etc. For these reasons, I would like to confirm that the nearest public road is 5280'+ to this location.

2) Please verify that this Location is on Dry Land Crop Land. Yes, dry crop land.

Also, with your concurrence, the COGCC can make the following changes.

The COGCC can change Sensitive Area to YES.. Agreed, please go ahead and make this change.

In addition, the following Conditions of Approval have been applied to the Form 2A. We accept both COAs.

1) Location lies within proximity of a surface water drainage. Operator shall use tertiary containment along the cross- and down-gradient perimeters of the edge of disturbance.

2) Operator shall provide notice to COGCC 48 hours prior to commencing construction of this Oil and Gas Location via Form 42.

Thank You

Melissa
