To: "Richardson, Craig" <Craig.Richardson@anadarko.com>

Craig,

I know I spoke with you about the Sunflower Tank battery earlier today. After discussing the location with the other OGLAs, I understand that there might not be an exact distance to from the nearest piece of equipment to the property line. Based on there being different property owners to the south and west, and with your concurrence, I will put a COA referencing Rule 605.a.(2) that tanks will be located 2 diameters or 350 feet, which ever is less, from the property line.

I will also remove the waste disposal information as this is a tank battery site and the drilling waste information is on the associated 2A for the well site.

Please let me know if you have any questions regarding these changes.

Thank you,
Rebecca
