**Subject:** PRESCO DRILLING IN PROJECT RULISON AREA

Brian, I had a very interesting and positive discussion with Larry McCown, Garfield Co. Commisioner, about our BM #25-12 permit application and the proposed COGCC hearing. Basically, Larry, and ,he believes, the majority of the county commission are supportive of our original proposal to drill from the surface location within 1/2 mile, penetrating the Williams Fork outside, provided we don't try to contract that area at this time. Rather, he would like us to drill wells around the area to prove our operating capability and that there is no radioactivity,at which time there should be far less oposition to drilling nearer to the PR site. I would like to discuss this and how we could simplify/expedite the #25-12 (and similar) permits. I'll be glad to call you if you specify an appropriate time. Thanks, Kim

*May 27 App. Deadline for July Hearing*
