

Photo 1. View of treated musk thistle plants with mature seedheads. These musk thistle plants should be removed to prevent further seed dispersal from the treated plants.

Photo 2. View of eastern portion of project area from northeastern corner of well pad facing southward. Revegetation is largely comprised of Indian ricegrass (*Achnatherum hymenoides*), smooth brome (*Bromus inermis*), and crested wheatgrass (*Agropyron cristatum*).

Photo 3. View from northeastern corner of project area facing center.

Photo 4. View of northern portion of project area from northeastern corner facing westward.
