Mr. Kyle Waggoner
Whiting Oil and Gas Corporation
208 Racquette Drive
Fort Collins, Colorado 80524

RE: Colorado Oil and Gas Conservation Commission Closure of Soil Remediation Projects 7392 and 7393 - Former Tinhorn Pits Associated with the Terrace Compressor Station and Terrace Gas Plant - Olsson Project #012-0790

Dear Mr. Waggoner,

Whiting Oil and Gas Corporation (Whiting) retained Olsson Associates (Olsson) to assist Whiting with remediation of two tinhorn pit facilities.

- Terrace Compressor station tin horn pit (COGCC facility #100035 - Remediation # 7392) located approximately one-eighth of a mile to the west of the Terrace Gas Plant and
- Two tin horns and an unlined earthen produced water pit (COGCC facility #100036 - Remediation # 7393) located on the west end of the Terrace Gas Plant and Compressor Station.

Olsson contacted the surface owner, Mr. Gene Nelson, on October 1, 2012 and had received verbal approval to land treat the impacted soils. K&K Oilfield Services provided the labor and equipment to excavate and remove each of the tin horns and impacted soils. K&K Oilfield Services also moved the impacted soils and constructed the landfarm cell located on the southwest corner of the Terrace Gas Plant located in NW ¼ NE ¼ of Section 18, Township 10 North, Range 58 West of the Sixth Principal Meridian. The tin horn pit locations and landfarm location are shown in Figure 1.

Olsson conducted environmental oversight of the excavation work in November and December 2012. Whiting had initially proposed to land treat impacted soils removed from these pits, but later decided to dispose of the soils at the Waste Management (WM) Northern Weld County Landfill near Ault, Colorado.

Description

The tin horn pits consisted of vertically buried culverts, eight feet in diameter, that extended approximately to a depth of ten feet below ground surface (bgs). Antelope Energy permitted the tin horns with the COGCC and used the pits prior to Whiting acquiring the field. The pits were in use until they were decommissioned, excavated, and removed in late 2012. The excavations were irregularly shaped and were advanced to greater depth in parts of the pit areas to follow soil impacts. The Terrace Compressor Station pit impacts extended to a depth of approximately 26 feet bgs beneath the center of the tinhorn and were advanced to a maximum depth of 13 feet around the perimeter of the tin horn. The footprint of the Terrace Compressor Station tinhorn was approximately 45 feet by 45 feet.

The Terrace Gas Plant tin horns were located to the southeast of an unlined earthen pit that measured approximately 52 feet by 59 feet. The excavation of the tinhorns extended into the produced water pit but terminated at 8 feet bgs. The impacts beneath the centers of the tin horns extended to between 16 feet bgs and 18 feet bgs.

Impacted soils from both pit locations were co-mingled for land farming. The landfarm cell was located on the southwest side of the Terrace Gas Plant. Olsson personnel visited the landfarm in January 2013. Copies of the site photographs of the landfarm cell are included as Attachment A.

Landfarm

Rock material that appeared to be less stained was observed on the north and south sides of the landfarm stockpile. The impacted stained soils were observed in the middle of the landfarm cell. The landfarm dimensions measured approximately 68 feet by 100 feet. The average height of the stockpile was estimated at approximately 7 feet. Olsson estimated the volume of the excavated materials from pit facility 10035 and facility 10036 at 1,763 cubic yards.

A review of aerial photographs of the landfarm cell show the interior dimensions inside the earthen berm to be approximately 56 feet by 94 feet. Site photographs taken in January 2013 show the average height of the stockpile may have been closer to 5 feet which when combined with the interior dimensions would yield a volume of approximately 975 cubic yards.

In June 2013, Whiting suggested that they might dispose of the soils at the Waste Management (WM) North Weld County landfill. In August 2013, Whiting contacted Olsson about estimates for sampling the landfarm materials, but indicated that they were still considering whether to continue with the plan to landfarm the soil, or to dispose of the impacted materials at a commercial landfill.

Since the soils consisted of exploration and production (E&P) wastes Olsson informed Whiting that the landfill would likely accept the wastes based on knowledge of process and Whiting may not need to sample the landfarm materials for waste characterization parameters if the landfill option was chosen. Whiting decided to dispose of the impacted soils at the WM North Weld County Landfill rather than landfarm the soils in the fall of 2013.

The stockpile soils were hauled to the WM North Weld County landfill on November 25, 26, and 27 and on December 2 and 3, 2013. Whiting personnel coordinated loading the materials with K&K Oilfield Services and the hauling and disposal of soils through WM and Bellio Trucking. Olsson personnel did not perform environmental oversight. The manifests indicate 18 cubic yard capacity trucks and loads ranging from 15 tons to 26 tons. If the 54 truckloads were all full at 18 cubic yards each yields 972 cubic yards. Copies of the signed waste manifests are included in Attachment B.

The COGCC issued no further action for the pit closure and tinhorn impacts based on a review of the pit closure reports on December 9, 2013; however, the email stated that remediation projects for the impacted soils and rock remained open pending land treatment or confirmation of offsite disposal. The impacted soils were removed from the site in November 2013. Olsson reported this to the COGCC on December 18, 2013. Correspondence is included in Attachment C.

Olsson personnel contacted Glen Klee with K&K Oilfield Services. According to Mr. Klee, to his recollection all of the stockpiled soils were hauled to the WM North Weld County landfill in Ault, Colorado. This report should provide the COGCC with the supporting information needed to close Remediation Projects 7392 and 7393. If you have any questions please contact me at 303.237.2072.

Sincerely,

Olsson Associates

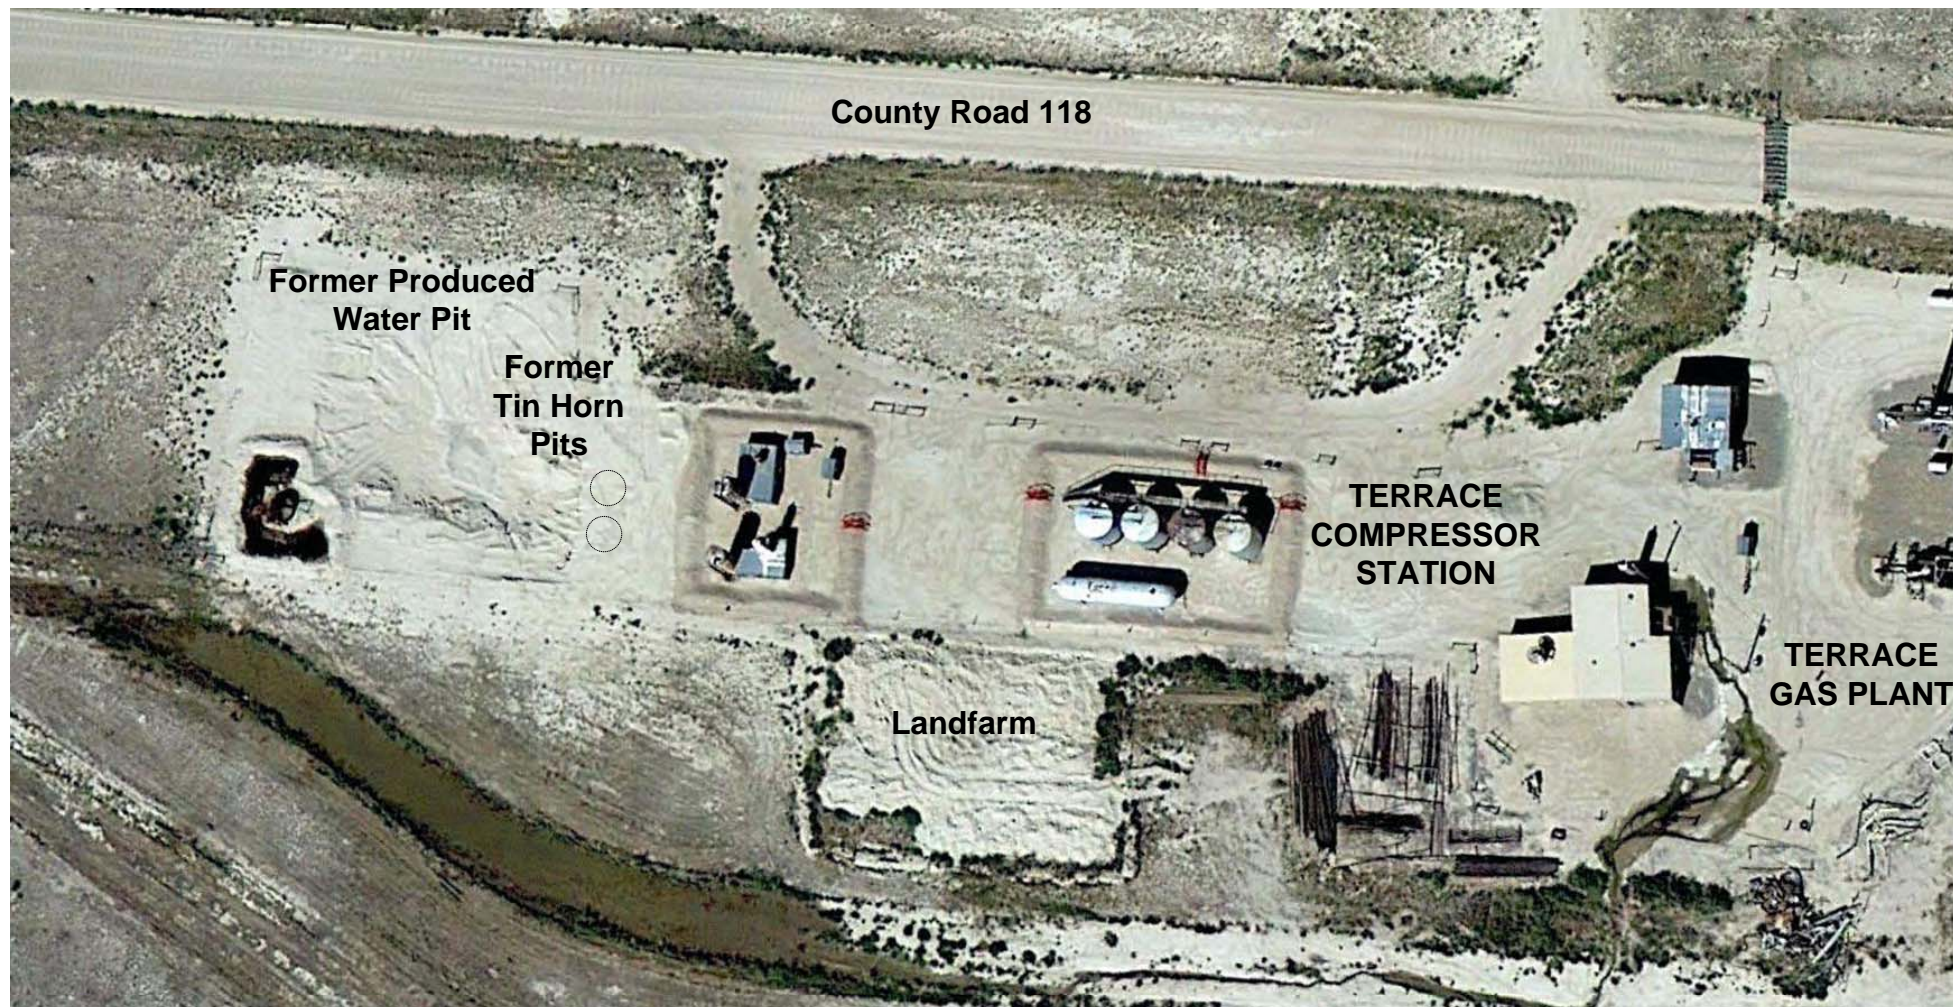

James W. Hix
Senior Geologist

ATTACHMENT A SITE PHOTOGRAPHS

Subject: Land farm stockpiles – west side of containment berm located south of the Terrace Gas Plant and WCR 118. The berm measured 68 feet North – South and was approximately 1.5 feet in height.

Date: 1/9/2013

View: East-Northeast

Subject: Land farm stockpiles – northwest corner of containment berm south of the Terrace Gas Plant and WCR 118.

Date: 01/09/2013

View: East

Subject: Land farm stock piles – west side of containment. Stained soil piles in the middle of the containment. Piles to the north and south are more rocky and did not exhibit as much staining.

Date: 01/09/2013

View: East

Subject: South side of land farm stockpiled soils and containment berm south of the Terrace Gas Plant and WCR 118 approximately 2.5 miles west of WCR 127.

Date: 01/09/2013

View: Northeast

Subject: Southeast corner of the land farm stockpile. The earthen berm measured 100 feet east-west and was approximately 1.5 feet in height. The earthen containment berm had some areas which need to be built up.

Date: 01/09/2013

View: Northwest

Subject: South side of the land farm stockpile containment. Material on the south side of the containment was more rocky and not as stained as material in the center of the containment.

Date: 01/09/2013

View: North - Northwest

Subject: East side of land farm soil stock pile and earthen containment berm. Stained material in the center of the berm area was stock piled in piles that were approximately 4 feet in height. Materials on the north side of the stock pile were approximately 8 feet in height.

Date: 01/09/2013

View: West

Subject: Materials on the north side of the stock pile were also more rocky and were excavated from the first pit on the west end of the Terrace Gas Plant. The materials are rocky with some large bedrock pieces, and did not appear to be heavily stained. It may be possible to remove some of this material for use in backfilling the first pit pending sampling and analysis.

Date: 01/09/2013

View: West - Northwest

Subject: Southwest corner of the land farm stock pile. The materials on the north and south side of the stock piles contained more rock and did not have as much staining as those in the center of the pile. These materials may be able to be sampled and used to finish backfilling the first pit (COGCC ID#100036) located beyond the vertical separators in the background and on the west end of the Terrace Gas Plant.

Date: 01/09/2013

View: West

Subject: Photograph shows the location of the second pit or tin horn following reclamation. The tin horn was located approximately 800 feet to the west of the Terrace Gas Plant and about 20 feet south of WCR 118 which is shown on the right hand side of the photo.

Date: 01/09/2013

View: West

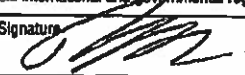

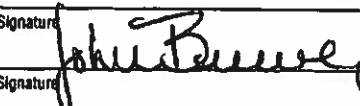

Subject: Photograph shows the location of the second pit, COGCC ID# 100035, located approximately 800 feet to the west of the Terrace Gas Plant. K&K reclaimed the pit using fill material from the Nelson Ranches gravel pit to the west. The area needs to be re-seeded to finish the reclamation.

Subject: Terrace Compressor Station Pit (Facility #100035) and Terrace Gas Plant Pit (Facility #100036), Section 18, T10N, R58W - Remediation Project #7392 and #7393

Annie,

Whiting Petroleum disposed of the impacted soil stockpile from the Terrace Gas Plant and Terrace Compressor Station Pits at Waste Management's North Weld County landfill in Ault, Colorado. Originally the soil was to be land farmed at the Terrace Gas Plant location; however, Whiting decided to dispose of the soils offsite. Whiting requests closure for Facility #100035 (Remediation Project #7392) and for Facility #100036 (Remediation Project #7393).

Kern 43-33 Pit, NESE 33 12N 62W, API #05-123-10268, Pit Facility #117951, Remediation Project #7391

James,

COGCC has reviewed the assessment report submitted by Olsson on behalf of Whiting Petroleum for the above referenced location. Based on a review of the data presented, it appears that no further action is necessary related to the pit closure and tin horn impacts, aside from surface restoration. According to the report provided, impacted soils from this location have been co-mingled for land farming (land treatment) with soils from:

- **Terrace Compressor Station Pit, NWNW18 10N 58W, Facility #100035, Remediation Project #7392**
- **Terrace Gas Plant Pit, NWNE 18 10N 58W, Facility #100036, Remediation Project #7393**

Please note for future reference: in cases where land treatment is proposed, a (separate) Form 27 should be submitted for approval by the Director. In lieu of the

separate Form 27 for land treatment, the Remediation Project #7391 will be left open until completion of the land treatment of the impacted soils has been approved by COGCC staff. Given this, the following **additional Conditions of Approval for Remediation #7391, #7392, and #7393 apply:**

- **Land treatment shall be performed in strict accordance with COGCC Rule 907.e. (2);**
- **Perform routine maintenance to prevent contamination of stormwater runoff;**
- **Land treatment shall be documented semi-annual status reports due each year on January 31st and June 30th, beginning with an initial report due no later than June 30, 2013;**
- **The status reports shall include the following information: Type and volume of microbes, nutrients or other amendments added, dates the material was aerated, moisturized, maintained, etc; and**
- **Note that a minimum of one soil sample per each 2,500 cubic yards is required.**

Please note that Whiting will need to request both the closure of pit *and* NFA determination for the remediation project when land treatment has been completed. **Please reference both the pit number #117951 and the Remediation Remediation Project #7391 number on any future correspondence.**

Please contact me or Rick Allison if you have any questions.

Thank you,

Ann Clements Eckman, P.G., *for*

John and Rick,

Attached is the Whiting Kern Produced Water Pit Closure Report for COGCC Pit #117951. Please let me know if you need hard copies of this report.
