Adams County,
Colorado Surface: Fee
Mineral Lease: Fee

Synergy Resources Corporation (Synergy) intends to apply to the Colorado Oil and Gas Conservation Commission (COGCC) to drill the above referenced wells at the described surface locations. COGCC Rule 318.A.a stipulates that a Greater Wattenberg Area (GWA) well surface location must be within a 400' by 400' drilling window centered at the center of each quarter-quarter section, or inside a 800' by 800' drilling window centered at the center of each quarter section. The above referenced wells fall outside of these drilling windows. As you are aware, the surface locations were chosen in concurrence with your wishes, as the surface owner, and due to topography.

Additionally, COGCC Rule 318.A.c. stipulates that a GWA well surface location shall not be less than 50' from an existing well. As planned, these surface locations are greater than 50' from an existing wells.

Per COGCC Rules, Synergy is required to obtain surface owner approval of these locations as they do not conform to COGCC GWA Rules. Should you find these exceptions acceptable, please sign the space provided below.

By approving this matter, we anticipate COGCC granting Synergy a location exception waiver to Rule 318.A.a and Rule 318.A.c allowing the location to be outside the COGCC GWA spacing rules and granting the GWA Twinning Rule..

Please contact Andrea Gross at 303-942-0506 or at agross@upstreampm.com if you have any questions.

Sincerely,

Permit Agent for Synergy Resources Corporation

By signing below, you acknowledge the agreed upon surface location of the well locations as staked and grant the waiver to COGCC Rule 318.A.a and 318.A.c granting that these wells may be drilled as planned.
