Gene,

I am writing in reference to the pit remediation project, at the Chivington 1 location, project number 8333.

Unless there is something that I am unaware of, it appears that progress has stalled out. We are getting into fall and I am sure you (nor the COGCC) want to see this project go into the winter months.

Moving forward we are requiring the following;

- a weekly update on progress, please note this is the third request.
- Provide by 9/3/2015 an anticipated completion date for the project.
- On 6/5/2015, COGCC requested operator: submit an amendment to project 8333 describing additional pit excavation, pit facility id 100601. This has not been received. add date

We have been on location several time over the course of the project, most recently 8/7/2015. We have received public inquiry on the completion date of the project. We will engage our enforcement group unless schedule (for completion) is received by the requested date.

Let's continue the momentum that we have built and close this project out.
