OGCC Scan,

Please upload the attached with the following information:

Unique identifier (REM/Spill/NOAV #, etc.): 102564 and 102565

Document number (leave blank if one needs to be assigned):

Date received: 8/24/2015

Is data entry needed (Y/N): n

Notes: please upload attached email as "water use for hydrotest"

Thanks!

Subject: main water plant pit

To: "Crossen, Tammie Lee" <tvzf@chevron.com>

Pressure test with fresh water is not a violation of COGCC rules. COGCC only regulates E&P waste.

Use of emergency pits is the responsibility of the operator. Temporary storage of fresh water does not violate pit use rules.

Fluid that is stored in the pit should be treated handled as E&P waste once it is removed, that is to say it is no longer "fresh water". It is understood that the stored water will be temporary, less than 72 hours, and will be used as injection fluid. It is also understood that this provides no significant threat to the public or a threat to public health, safety or welfare.

pit freeboard should not be less than 2'.
