WASTE MANAGEMENT PLAN

Pursuant to compliance with Colorado Oil and Gas (COGCC) Rule 907, Ward Petroleum Corporation (Ward), plan outlines Ward Petroleum Corporation's general plan for handling and disposal of all Exploration and Production Waste, including drilling cuttings, drill fluids and produced fluids. Ward Petroleum Corporation will adhere to all stipulations under COGCC Rule 910.

Drill Cuttings:

A closed loop drilling system will be used. The cuttings will be stored in an above ground container and hauled offsite. The proposed service provider will be:

Kinetic Hydrovac

All drill cuttings will be hauled to:

Republic Services

Tower Landfill

88th and Tower Road

Commerce City, CO 80022

Manifested as E&P Hydrocarbon Soil Cuttings

Drill Fluids:

A closed loop drilling system will be used. The fluids will be stored in an above ground container and hauled offsite by Kinetic Hydrovac to an approved disposal facility or if possible, recycled and used on future locations. The disposal facility is located at:

Republic Services

Tower Landfill

88th and Tower Road

Commerce City, CO 80022

Manifested as E&P Hydrocarbon Soil Cuttings

Produced Fluids:

Produced and flowback water will be stored in containers that meet COGCC regulations. The fluids will be hauled to an approved disposal facility by a licensed third party transportation company.
