**Subject:** State Reportable Release

Good Evening,

We had a State Reportable Release at the location noted below. While deconstructing the location, historically impacted soils were encountered. During excavation activities, shallow groundwater was encountered. On August 26, 2015 laboratory analytical results indicated shallow groundwater had been impacted, exceeding CGWQS allowable levels. A forthcoming Form 19 will be submitted. Please let me know if you have any questions. Thank you,
