Dear Mr. Lepore,

Extraction Oil & Gas, LLC (Extraction) hereby certifies that it has complied with Rule 306.e, which states that an Operator shall be available to meet with building unit owners who received an OGLA notice or a buffer zone notice pursuant to Rule 305.c. and requested a meeting regarding the proposed oil and gas location. The operator sent notices pursuant to Rule 305.c, and received one request from Varra Companies for a meeting on 7/31/2015. Extraction met with Varra Companies on 8/13/2015. Attendees included:

Brad Jones – Varra Companies  
Garrett Varra – Varra Companies  
Jamison McIlvain – Extraction  
Blane Thingelstad – Extraction  
Erin Mathews – Extraction  
Lance Fondren – XTR Midstream

The meeting went well. Varra companies wanted to understand the scope of our project and to make sure it would not impact the operations on their property. They are currently mining/dredging out the gravel pit to the east of our location. They intend to use it for water storage within the year. They expressed the need to continue to use the access road that straddles the property line between the two parcels. We discussed to make sure the grading will tie in and not affect the road. The old structures on the property next to the existing oil and gas operations were discussed. Garrett indicated that per their Use by Special Review (USR) Varra Companies is not allowed to use the structures for anything as they are located in the floodplain. Historically the larger structure was used as a shop. Now the structure is vacant. Varra Companies indicated that the buildings could be removed, but would want Extraction to participate in cost to do so. Electric power supply in the area was also discussed.

Extraction respectfully requests that the Director approve the proposed oil and gas location. Should you have any questions or concerns please contact the undersigned at 720-420-5749.

Sincerely,

A handwritten signature in cursive script that reads "Alyssa Andrews".
