Dave,

The North Hayden 1-26, Amended Form 2A has been filed to include drilling a second well on the pad. The North Hayden 1-26 (API #05-107-06263) has recently been completed and is currently on flowback. Given the results of the completion, SWN would elect to have the Form 2A Facilities count reflect the following.

Wells: 2  
Pump Jacks: 2  
Gas or Diesel Motors: 2 (*used to run pump jacks*)  
Dehydrator Units: 0 (please amend to '0')  
Oil Tanks: 3  
Separators: 3  
VOC Combustors: 2 (*per COGCC 912.d*)  
Water Tanks: 3

The gas production of both wells will be separated from the liquids and incinerated at the VOC combustor. The cost to build infrastructure for gas sales would render the project uneconomical at this time.

Please let me know if you have any additional questions.

Cheryl
