Kyle,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

1) In the Water Resources section you have indicated the estimated depth to groundwater is 440 feet based on the nearest water well (Permit #271318). A review of that water well permit indicates that 440 feet is the total depth of the well, while the static water level is 40 feet. Therefore, I would like to change the estimated depth to groundwater to 40 feet.

2) Because the locations current and future land use is Crop Land (Dry land), the inclusion of a Reference Area Map and Reference Area Pictures attachment is not required. Therefore I would like to remove those two attachments from this Form 2A.

Please respond to this correspondence by October 8, 2015. If you have any questions, please contact me. Thank you.
