Check if impacted or threatened by spill/Release (please answer Yes/No to all that apply):

Waters of the State ☐ Residence/Occupied Structure ☐ Livestock ☐ Public Byway ☐ Surface Water Supply Area ☐

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

During normal operations visual staining was noted in the area adjacent to the heater-treater skid load out on the Black Sulfur Tank Battery location. Preliminary investigation indicates historic impacts of produced water and condensate in soils adjacent to the heater-treater. Impacted soils will be removed and transported to an approved disposal/recycling facility and confirmation samples will be collected to verify COGCC Table 910-1 compliance. Additional information will be provided in the Form 19A.

Environmental	Based on review of information presented, it appears that no further action is necessary at this time, and COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site.	9/10/2015 7:59:19 AM
