Hi Matt,

You are correct, we double checked and couldn't find the Form 19 in COGIS. We are following up with the operator to determine what happened. It will be entered into the system as soon as possible. Thank you for bringing this to our attention.

John

Matt, I will look into this spill report and the associated site investigation plan and try to determine if indeed it is not in the system and if so why. I was not the COGCC environmental staff member covering the area until about a month ago and I will have to check with other staff on this matter.

Greg and Peter -

I have received this Form 19 from a client (who received it from Anadarko) but I cannot find the Form 19 nor the remediation workplan on the COGCC website. Can you help me track this down? Is there a reason it would not be on the website? Is there a reason the spill would be reported in April of 2014 but the remediation plan is dated last month?

Feel free to pass this along to the appropriate person.

Thanks for your help.
